STEP 2:

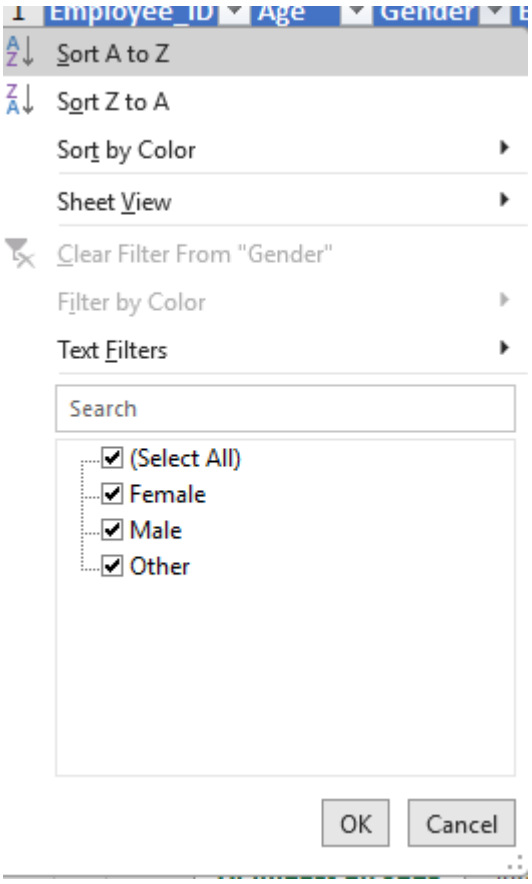

Replacing the inconsistent data:

There were lot of categories under Gender columns , replaced them with 3 valid names Male, Female and Other

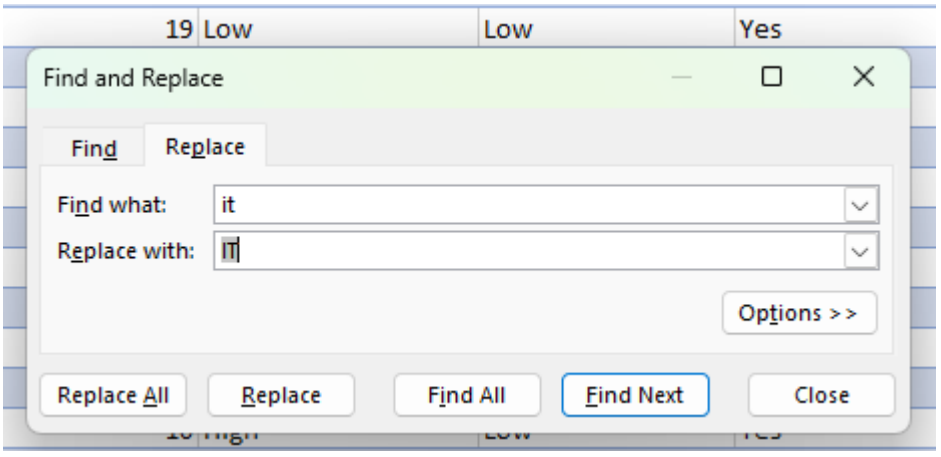

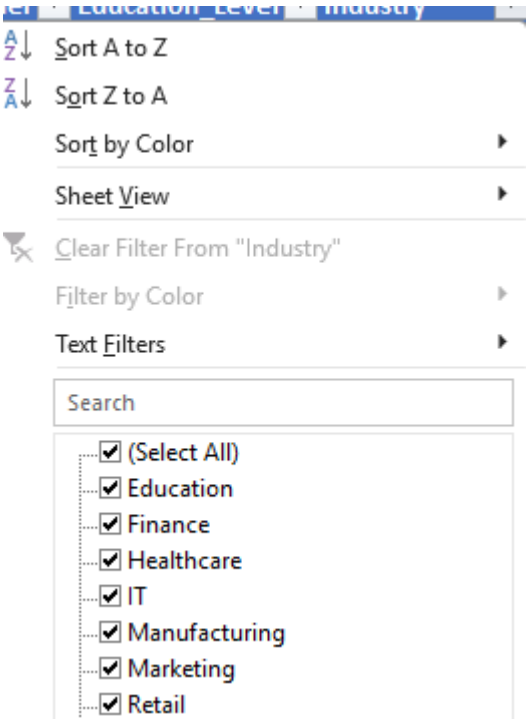

Utilized **ctrl+h** replace option to do this

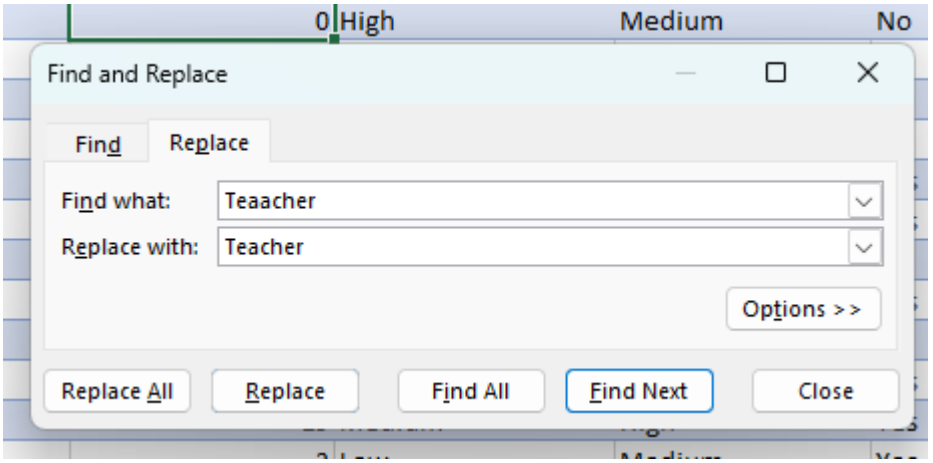

Industry column:
Replaced all the “it” to ”IT”

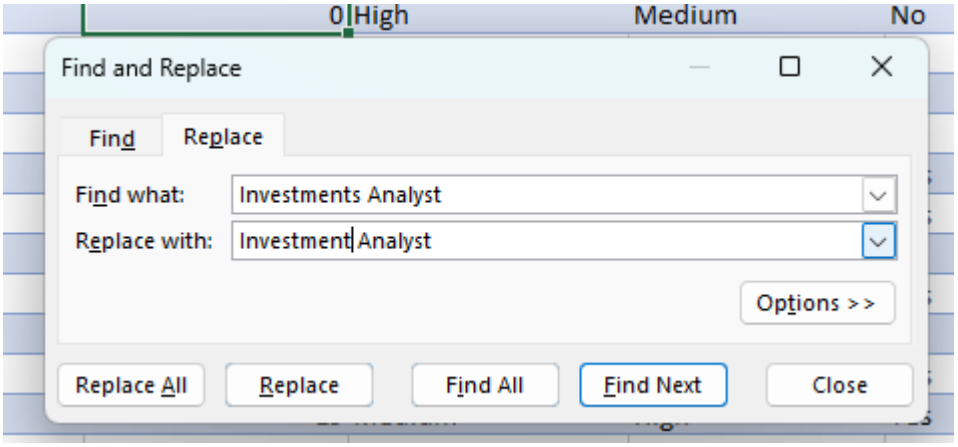

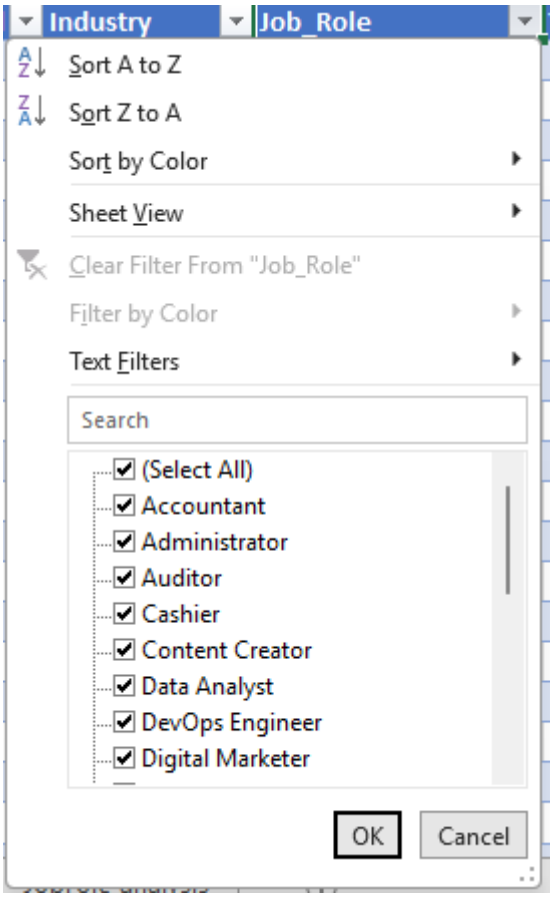

Job Role Column:

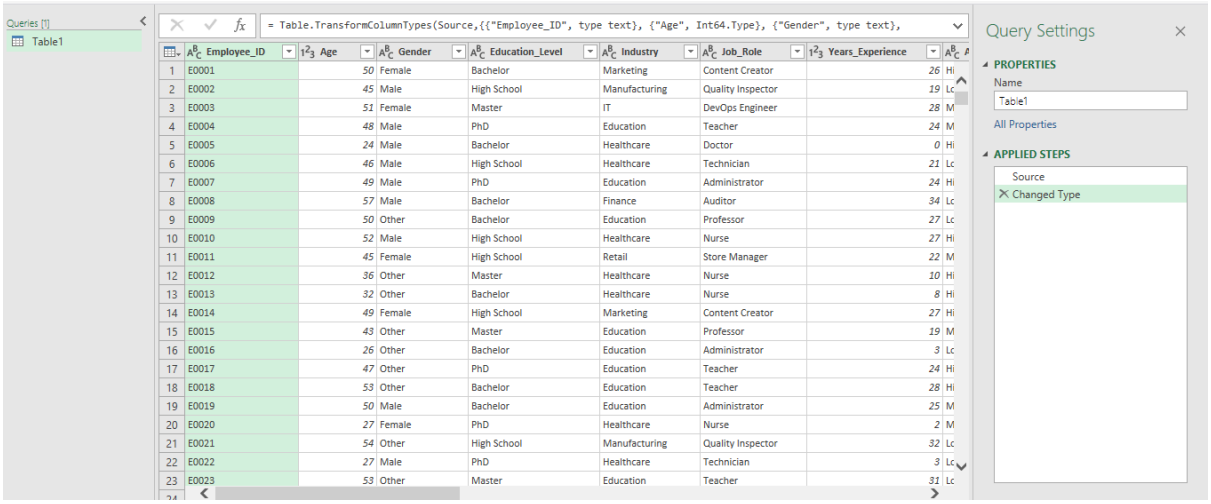

Replaced all the inconsistent data with the accurate one

STEP 3:
Loaded the table to a power query editor to clean

AI impact on Jobs | Industry Details | Jobrole analysis | Sheet1

STEP 6:

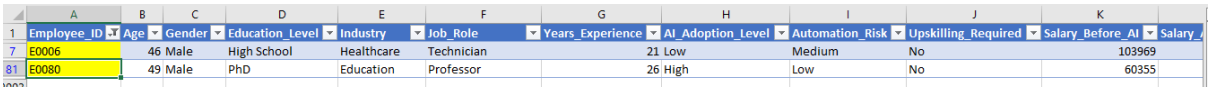

Filling the Missing Values:

Employee_ID column:

Two missing values were identified in the Employee_ID column. After observing the entire column, I noted the IDs followed a sequential pattern. Based on this pattern ,fill the missing values with appropriate IDs to maintain Data consistency.

	Employee_ID	Age	Gender	Education_Level	Industry	Job_Role	Years_Experience	AI_Adoption_Level	Automation_Risk	Upskilling_Required	Salary_Before_AI
7		46	Male	High School	Healthcare	Technician	21	Low	Medium	No	103969
81		49	Male	PhD	Education	Professor	26	High	Low	No	60355

	Employee_ID	Age	Gender	Education_Level	Industry	Job_Role	Years_Experience	AI_Adoption_Level	Automation_Risk	Upskilling_Required	Salary_Before_AI
7	E0006	46	Male	High School	Healthcare	Technician	21	Low	Medium	No	103969
81	E0080	49	Male	PhD	Education	Professor	26	High	Low	No	60355

AGE Column:

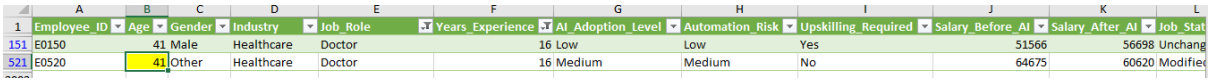

There was a missing value in the age column

	Employee_ID	Age	Gender	Industry	Job_Role	Years_Experience	AI_Adoption_Level	Automation_Risk	Upskilling_Required	Salary_Before_AI	Salary_After_AI
521	E0520		Other	Healthcare	Doctor	16	Medium	Medium	No	64675	60620

The Age column contained a missing value for an employee with 16 years of work experience. I filtered the dataset using the Doctor job role

and 16 years of experience, then identified the corresponding age as 41. Based on this matching record, I filled the missing Age value with 41.

	A	B	C	D	E	F	G	H	I	J	K	L
1	Employee_ID	Age	Gender	Industry	Job_Role	Years_Experience	AI_Adoption_Level	Automation_Risk	Upskilling_Required	Salary_Before_AI	Salary_After_AI	Job_Stat

521	E0520	41	Other	Healthcare	Doctor	16	Medium	Medium	No	64675	60620	Modifie

Industry Column:

A missing value was identified in the Industry column for an employee whose Job Role was Teacher. I filled the missing value with "Education" because the teaching profession is generally associated with the Education industry.

	A	B	C	D	E	F	G	H	I	J	K	L
1	Employee_ID	Age	Gender	Industry	Job_Role	Years_Experience	AI_Adoption_Level	Automation_Risk	Upskilling_Required	Salary_Before_AI	Salary_After_AI	Job_Stat

Upskilling Required:

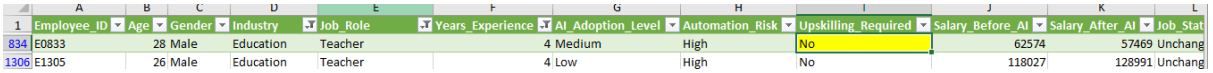

Two missing values were identified in this column. I compared the job roles and years of experience of employees with similar profiles and filled the missing values using the corresponding values from comparable records

1	Employee_ID	Age	Gender	Industry	Job_Role	Years_Experience	AI_Adoption_Level	Automation_Risk	Upskilling_Required	Salary_Before_AI	Salary_After_AI	Job_Stat
